DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to method for applying material through openings of previous portions of a pattern sheet, classified in class 101, subclass 483.
 - II. Claim 5, drawn to printed matter, which obstructs or hides information contained within or on the printed matter, classified in class 283, subclass 72.
2. Inventions GI and GII are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because GI is drawn to method for applying material through openings of previous portions of a pattern sheet. The subcombination has separate utility such as GII is drawn to printed matter, which obstructs or hides information contained within or on the printed matter.
3. Because these inventions are distinct for the reasons given above and have acquired a separate in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2622

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
